## EDUCATION

---

### University of Warwick

*PhD in Computer Science*

October 2024 - Present  
Coventry, United Kingdom

- ‘Generative models for augmenting 3D Biomedical image training data’ supervised by Prof. Till Bretschneider.

### Imperial College London

*MSc in Advanced Computing - Distinction*

Sep 2023 - Sep 2024  
London, United Kingdom

- Modules: Machine Learning for Imaging, Statistical Information Theory, Deep Learning, Computer Vision, Reinforcement Learning, Deep Graph Learning, Computational Neurodynamics;
- Dissertation in Probabilistic ML: *Physics-Informed Factor Graphs for Learning in Complex Dynamical Systems* - 81%.

### University of Warwick

*BSc (Honours) Computer Science - First Class (20/21, 21/22, & 22/23)*

Sep 2020 - Jul 2023  
Coventry, United Kingdom

- Modules: Functional Programming, Algorithms, Advanced Computer Architecture, Computational Physics, Electrical and Electronic Circuits, Machine Learning, Neural Computing;
- Dissertation in Generative Modelling: *Tools for augmentation of training data* - 82%.

## EXPERIENCE

---

### The Trade Desk

*Software Engineering Intern - Connected TV Inventory*

July 2023 - September 2023  
London, United Kingdom

The Trade Desk is one of the world’s largest demand side platforms powering programmatic advertising.

- Engineered a data processing pipeline to analyse data from **AWS S3** into **Vertica** on an hourly basis to calculating ad metrics for podded advertisements, using **Apache Airflow**, **Apache Spark**, **SQL** and **Databricks**;
- Designed a **Grafana** dashboard connected to **Vertica** to display the calculated metrics as an internal tool for the CTV engineers;

### American Express

*Technology Engineer Internship - Global Commercial Services*

June 2022 - August 2022  
London, United Kingdom

- Collaborated in a group of 6 interns and 3 full time engineers on a software project, following the **Scrum** methodology;
- Designed and engineered a micro-services based web application to facilitate data migration between the old FXIP platform to the new Global Pay platform; built using **Kotlin**, **Spring Boot**, **React**, **PostgreSQL** and **Apache Kafka**;
- Implemented containerization using **Docker** to isolate the services and databases into their own containers, facilitating a streamlined deployment to production.

### Warwick Moto

*Lead Mathematical Modelling & Software Engineer*

June 2022 - July 2023  
University of Warwick

Warwick Moto is a student-led engineering team to build fully-electric race-spec superbike.

- Lead a team of 4 software engineers to develop advanced **particle swarm optimisation** scripts using **MATLAB** and **Simulink** to minimise lap times and maximise efficiency of a virtual model bike, achieving the optimal gear ratio for the next-generation superbike;
- Engineered and developed a new frontend for the Warwick Moto website using **Typescript** and **React**, increasing marketability of the product and improving external relations;
- Facilitated the transition of the code and models to **GitHub Enterprise** and enforced code standards and SOPs.

*Mathematical Modelling & Control Systems Engineer*

November 2020 - June 2023

- Designed algorithms in **Python** to compute an elevation cycle for the Isle of Man circuit using geographical data and a drive cycle;
- Engineered a 3 degree of freedom vehicle model in **Simulink** using the vehicle dynamics blockset to simulate longitudinal and lateral movement of the bike;
- Developed an algorithm to convert waypoint data of any racetrack into a steering cycle to simulate the running of a bike on a track;
- Programmed a new Electronic Control Unit with two CAN channels based on the Embed E400 Automotive Controller using **Simulink** and **CANalyzer**;
- Implemented contactor sequencing to ensure safe startup, state transitions and shut down for the motor and inverter on the bike.

### Primrose Hill Surgery

*Administrator & IT Support*

June 2021 - August 2021  
London

- Utilized **Pandas** and **NumPy** to perform data analysis on vaccination data at the local vaccination site to enable equitable allocation of funds;
- Performed searches on **EMIS** to sort patients based on criterion to provide specialised care;
- Operated the NHS e-referral service to refer patients to hospitals for advanced care;
- Volunteered at the local vaccination site as a vaccinator to administer over **1000** COVID-19 jabs;
- Coordinated the IT response to manage the **Palantir Foundry** vaccine ordering platform and Outcomes for Health Point of Care system to ensure smooth operations.

## SKILLS

---

**Languages:** Python, Java, HTML, CSS, JavaScript, PHP, SQL, MATLAB, Simulink, Kotlin, PostgreSQL,  $\text{\LaTeX}$

**Frameworks/Tools:** matplotlib, numpy, scipy, pandas, Flask, React, React Native, Beautiful Soup, PyTorch
